The One Stop Supplier to the Lighting Industry

26-36 Frankfort Street, Newtown, Birmingham B19 2YH  
Tel: 0121 359 8585 Fax: 0121 333 7774 Email: info@inlico.com

## **Superglue and Superlock**

These products have been specified with the needs of the lighting industry in mind.

### **Superglue Cyanoacrylate Adhesive (20g Bottle)**

This is a medium viscosity cyanoacrylate adhesive for the fast bonding of a wide range of materials including wood, metal, rubber and plastics. It is particularly suitable for close fitting parts but will cope with gaps of up to 0.1mm.

NB Bonds immediately with skin tissue and is an eye irritant. Seek medical help for eye or internal contact.

### **Superlock (10ml Bottle)**

Superlock is an anaerobic threadlocking product which incorporates the latest advances in adhesive technology and is widely used with absolute confidence throughout engineering.

It prevents fasteners from loosening under vibration but still provides for easy adjustment and dismantling of components.

Low viscosity and high capillary action for locking and sealing threaded fasteners and close fittings parts post assembly, also to penetrate and seal metal porosity in moulds and in castings. Highly resistant to temperatures (-50° to +150°C), corrosion, vibrations, water, gases, oils, hydrocarbons, and many chemicals, medium to high strength locking.

This product is non-toxic and is not commonly allergenic.
